Summary

B.Tech Computer Science student with hands-on experience in full-stack web development using **React**, **Node.js**, **Express**, and **MongoDB**, with exposure to the software development lifecycle (SDLC). Strong foundation in **Data Structures & Algorithms** with **100+ problems** solved on **LeetCode**. Built real-time and scalable applications using **REST APIs**, authentication, and cloud deployment.

Projects

Real-Time Full-Stack Messaging Web Application (CozyChat) : [Live Demo](#)

August 2025

- Designed a real-time messaging system supporting multiple concurrent users with **Socket.io**, enabling instant message delivery and presence updates.
- Developed **RESTful backend APIs** for authentication, authorization, and **CRUD** operations using **Node.js** and **Express**.
- Implemented **JWT-based** authentication and secure password hashing with **bcrypt**.
- Modeled scalable schemas using **MongoDB** and **Mongoose**.
- Deployed the application on **Render** with environment-based configuration.

Aranya : [Live Demo](#)

September 2025

- Built the **admin-facing React frontend** for a digital governance platform to manage **Forest Rights Act (FRA) land claim workflows**.
- Designed **dashboard-style, role-based UI flows** for claim review, editing, status tracking, and approval stages.
- Implemented **geospatial visualization interfaces** to enable visual verification of land claims against mapped boundaries.
- Developed **decision-support UI components** displaying rule-based suitability, vulnerability, and priority scores.
- Created **document preview and report views** aligned with official government formats to support verification and audit readiness.
- Structured the frontend with modular, scalable components and deployed via **Netlify** with **CI/CD** for rapid iteration.

Technical Skills

- Languages:** JavaScript, C++
- Core CS Concepts:** Data Structures & Algorithms, OOP, System Design
- Frameworks & Libraries:** React.js, Tailwind CSS, Node.js, Express.js, Socket.io
- Tools:** Git/GitHub, Netlify, Render
- Testing & APIs:** Postman, REST API testing, basic unit testing
- Databases:** MongoDB

Education

HMR Institute of Technology & Management, Delhi

Bachelor of Technology (computer science and engineering)

CGPA 8.1/10

June 2022 – June 2026

Modern Era Convent , B-1, Janakpuri, Delhi

12th | CBSE

91 %

July 2020 – Aug 2021

Achievements/Certifications

- National Finalist, Smart India Hackathon 2025** — selected from **10,000+ teams nationwide** after multiple evaluation rounds. [Certificate](#)
- Coding Blocks Master Data Structures and Algorithms using C++ & System Design.** [Certificate](#)
